Palomar Health | Pathmaker Internship

RE: Hours Verification – Caitlin Hume

To Whom It May Concern:

I am writing to verify internship hours for Caitlin Hume. Caitlin began our internship in July 2018 and as of August 2020, has graduated from Palomar Health's Pathmaker Internship. The Pathmaker Internship is a non-compensated internship for pre-health professional students.

In this internship, interns get hands-on experience as part of the patient care team by supporting the staff with daily patient care. This includes assisting patients with daily needs (bathing, feeding, rehabilitation, etc.), as well as supporting the unit by answering call lights, setting up rooms, stocking supplies, discharging patients, and interfacing with visitors and families on a regular basis.

In total, Caitlin completed **353.25** total program hours, with **328.75** of those hours being direct bedside care.

Sincerely,

Trang Nguyen

Supervisor, Pipeline Career Services
